# CRASH TEST

## We've driven our products into the wall - successfully

All Sortimo van racking solutions have been crash tested. In co-operation with the German TÜV, Dekra and ADAC, Sortimo simulates the emergency under real conditions, so that your load won't become a life-threatening projectile in case of a crash.

At a barrier impact speed of 50 km/h, the Sortimo products are literally driven into the wall. This way we ensure that our van racking solutions also meet the high demands of Sortimo when it comes to safety.

Only those which pass their on-road test are good enough for our customers.

## EVERYTHING READY AT HAND AND STOWED AWAY QUICKLY WITH THE SOWAAPP ACCESSORIES:

# TOPSYSTEM – FLEXIBLE LOAD SECURITY ON THE VEHICLE ROOF

## Ladder lift rear

The ladder lift is suitable for the convenient transport of heavy ladders. Lifting and lashing of ladders is no longer required thanks to the hydraulic cylinder supported lift system. That way one and multi-part ladders can be conveniently handled from the ground. The ladder lift is available in two basic lengths, 2.5 and 3 meters.

## Loading roller

The ideal aid for heavy or large transport goods. The loading roller helps to load and unload goods onto and off of the roof very conveniently.

It is available in all cross profile widths and is positioned in between the side rails.

## ProSafe

ProSafe enables the integrated serial production in the Top System from Sortimo. ProSafe lashing straps can be hooked into the cross members without any difficulty. ProSafe makes load securing possible in no time at all.

## Cross members

Every TopSystem Cross member, whether the basic or the premium variation, allows a revenue load of 50 kilo.

## Side rail

The aluminium side rail serves the purpose of stability and integrates any amount of cross profiles. The company logo can be applied to the side rail.

## Aluminium Transport tube

The perfect extension of the TopSystem. Can transport long goods dry and secure. The cover/endcap is lockable.

The aluminium transport tube is available in the basic lengths 2, 3 and 5 metres made of plastic.

## Lighting systems

Warning lights for securing your work area are the perfect extension for your roof racking system. We provide a warning halogen beacon with plug socket, LES beacon yellow with plug socket and LED beacon yellow with magnetic base/socket.

## Load stopper 150

The load stopper 150 consists of corrosion resistant stainless steel, therefore no coating is necessary. It can be used as a transport tube, as a load stopper from the side or even for securing a ladder. In addition it can be retrofitted onto the cross members and has a very good noise behaviour.

You find further information in the TopSystem brochure. Please order our catalogue using the form on **page 33** or download it: [sortimo.com/catalogues](http://sortimo.com/catalogues).

## ORIGINAL ACCESSORIES FROM SORTIMO

With the help of **Sortimo's industry-specific Original Accessories** our Xpress racks can be customised to your individual needs. The convenient perforated aluminium plate for example offers the ideal place to attach hooks and holders for tools and documents.

Moreover, customised partitions and divider sets for drawers or trays, storage pockets, lashing rails, workbenches and much more facilitate the best usage of your vehicle.
