# The climate-neutral shelving system for parcel delivery service providers

**Optimum use** of the loading space, as the system can be adapted to the shape of the vehicle

**Enhanced efficiency** due to folding shelves with gas struts for one-handed operation

**Time savings** due to integrated load securing with ProSafe

**Reduction** of the carbon footprint due to CO<sub>2</sub>-neutral production using recycled material

You can find a video about the new FlexRack 2.0 shelving system at [mysortimo.co.uk/flexrack2-0](https://mysortimo.co.uk/flexrack2-0). You can find accessories on our website or in our complete catalogue at [mysortimo.co.uk/en\\_UK/products/catalogues](https://mysortimo.co.uk/en_UK/products/catalogues).

## The climate-neutral shelving system for parcel delivery service providers

The new FlexRack 2.0 from Sortimo is a sustainable product that is made from recycled materials using a carbon-neutral manufacturing process. Once the lease of the vehicle has expired, the shelves can be returned for refurbishment.

### The new climate-neutral shelving system – FlexRack 2.0

- CO<sub>2</sub>-neutral production, made from recycled material (lightweight aluminium)
- Long service life and high load capacity thanks to quality materials
- Maximum flexibility, as shelves can be adjusted to all widths and depths depending on the customer requirements
- Permissible load of 80 kg per linear meter
- Space for bulky items thanks to folding shelves
- Optimal use of the loading space, as the uprights can be adapted to the shape of the vehicle
- Safety during transport due to integrated load securing with ProSafe in the uprights
- No shifting of packages due to high friction values of the shelves (0.6u) which also benefit from an integrated anti-slip edge
- Safe work environment due to rounded edges
- One-handed operation possible due to gas pressure struts on the shelves
- Optional Pick by Light integration possible

### ProPartition – Innovative partition with integrated sliding door

- Optimisation of the workflow for the parcel service driver
- Time saved thanks to direct access to loading space from driver's cab
- Greater safety through short, safe distances in the vehicle
- Retains the original lashing points for load securing
- Safety at work thanks to flat door threshold and edge protection
- Optional lockable sliding door

## The climate-neutral shelving system for parcel delivery service providers

The Zusmarshausen production facility and the fleet upgrade center are conveniently located near the A8 motorway, between Augsburg and Ulm. The entire Sortimo product range goes out to the rest of the world from here.

### Our vision: Carbon-neutral production

As an **international company**, we are aware of our responsibility to comply with legal, environmental and also cultural requirements and promises. We have developed different guidelines and codes of conduct from all these requirements that establish a clear and binding standard for socially responsible and environmentally aware conduct in our company.

The target is ambitious: **we are on course for carbon-neutral production** at our one and only production facility, located in Zusmarshausen. This target will be achieved based on four pillars: low-carbon product design, energy efficiency via intelligent power management in combination with the Sortimo Innovation Park, renewable electricity and carbon reduction.

It goes without saying that, for many years now, we have strictly adhered to all Code of Conduct-related issues in our selection of suppliers and subcontractors, as well as the guidelines on sustainable procurement with regard to labour and human rights plus anti-corruption.
